

CCSA Health and Safety Program Review (HSPR)

The CCSA Health and Safety Program Review (HSPR) consists of a complete assessment of your entire health and safety program. Upon completion, CCSA Consultants are able to provide you with information and education about how to improve your program based on new (Bill 30) and existing legislation, industry best-practice and elements from the Certificate of Recognition (COR) program.

What's it all about?

- The Health and Safety Program Review is not an Audit; there is not a pass/fail or grade that needs to be achieved for the review. However, the findings will be provided to you in a final report. The report will identify:
 - Critical health and safety program areas that are not compliant with legislation
 - Opportunities to improve the health and safety program based on industry best-practice and/or government standards/COR elements
 - Health and safety program activities, policies or procedures where the organization/community is in compliance with legislation and/or meets industry best-practice.

How does it work?

- The Health and Safety Program review includes three important steps:
 1. Online self-assessment and action plan, completed by the organization (timeframe: approximately 15 minutes to complete the online self-assessment)
 2. On-site Health and Safety Program Review, completed in collaboration with CCSA Consultants and the organization (timeframe: approximately 2 days on-site)
 3. Final report meeting, completed with CCSA Consultants and organization leadership team within approximately 2 weeks of the on-site review. This meeting may be held in-person, over the telephone or via video conferencing depending on location and CCSA Consultant availability

What does it cost?

- The cost for the Health and Safety Program Review is dependent on whether overnight travel is required and whether the organization is a CCSA member or non-member:

	CCSA Members	Non-Members
no overnight	\$200.00	\$350.00
overnight travel required	\$350.00	\$500.00

The CCSA is accepting registrations for the Health and Safety Program Review and are currently scheduling reviews based on CCSA Consultant availability.

Visit the CCSA website to learn more and to register for the HSPR
