READINESS TO RESPOND TO RISK
SAFETY SEGMENTS

A culture of safety is one of the best ways to improve the overall well-being of employees at your organization. And that culture starts with being risk aware.

With guidance and practice, your employees can become your best safety asset, maintaining a state of readiness and awareness. They are your eyes on the ground, seeing and hearing what goes on every day, and they just might be able to spot an oncoming threat that would have been missed without their risk awareness skills.

MENTAL HEALTH FOCUS: WELLNESS CHECKS

What surrounds you each day in your home, work, or neighborhood and the resources available to you can affect your health. You can't always choose what's in the environments you live, work, or play in. But taking small steps to make your environment safer and limiting your exposure to potentially harmful substances can help keep you healthier. Please print out the following infographic and give each staff member 5 minutes to read it. After everyone is done, use the guiding questions to facilitate a group discussion

SAFETY SEGMENT DISCUSSION

Guiding Questions:

- Why is it important to be aware of your surroundings?
- How can you improve your situational awareness?

Notes to the Team Leader:

- Facilitate an atmosphere of support and openness to feedback by encouraging the staff to share experiences or opinions without fear of reprisal.

Alternative Activity:

You can also watch play this video: "Learn about the national Standard - Psychological Protection" by havethetalk.

- Why is organizational culture essential?
