

CCSA SAFETY SEGMENTS

Outdoor Equipment & Tool Training

Summer Hazards

What We Are Learning

Working outside often means using tools and equipment in less controlled environments. We are focusing on how to safely use outdoor tools and equipment during summer activities. This includes checking tools before use, wearing protective gear, and keeping work areas clean and organized. We also explore ways to prevent injuries by following safety rules and staying aware of our surroundings. These actions help us stay safe while enjoying activities like gardening, yard work, or helping around the home.

Guiding Questions ?

- What should you check before using any outdoor equipment or tool?
- Why is it important to wear protective gear when using tools?
- How can you keep your work area safe during outdoor projects?

Directions

Start the discussion by setting the expectations for creating a safe space and respecting everyone's feedback. Print out copies of Outdoor Equipment and Tool Safety Poster. After everyone is done, use the guiding questions to facilitate a group discussion.
